

America's #1 Rated Residential Furnace Inspection Training & Certification Program

"You will walk away with decades of knowledge in just one day. If you care about the safety of your customers or want to generate leads, this is the class for you."

- Course graduate

Hands-On Inspection

Examine over 60 real, field-tested furnaces and heat exchangers to identify stress points, fracture areas, and common failure sites.

Defect Identification

Learn to identify common defects and failures that occur in both older and newer, high-efficiency heat exchangers.

Customer Safety

Learn how to guide customers through the furnace inspection process with a focus on honesty, transparency, and safety.

Program Highlights

Seminar attendees receive a copy of the official Furnace Inspection Manual- containing defect prone areas and inspection methods for nearly all furnace makes and models.

Students will gain hands-on instruction from leading industry HVAC experts. We bring over 60 field-tested furnaces and heat exchangers straight to your classroom.

Program graduates will be recognized with the official Heat Exchanger Experts® Seal of Certification.

About Us

Established in 1993 by HVAC expert Ellis Prach, Heat Exchanger Experts delivers over 50 years of field experience and research in the evaluation and inspection of residential heat exchangers—all condensed into one comprehensive, day-long course.

Meet the Instructors

Russell and Christopher Prach are seasoned residential HVAC experts with over 30 years of experience inspecting and diagnosing residential furnaces and heat exchangers.
