

PROGRAM FOCUS

Hands-On Inspection

Examine over 60 real, field-tested furnaces and heat exchangers to identify stress points, fracture areas, and common failure sites.

Defect Identification

Learn to identify common defects and failures that occur in both older and newer, high-efficiency heat exchangers.

Customer Service

Learn how to guide customers through the furnace inspection process with a focus on honesty, transparency, and safety.

Fort Collins, CO

**HEAT EXCHANGER
EXPERTS** | EST 1993

Hands-on residential furnace inspection
training taught by industry experts

America's #1 rated residential
furnace heat exchanger
inspection and certification
program

Program Take Aways

Each seminar attendee receives:

- The Furnace Inspection Manual- containing defect prone areas and inspection methods for nearly all makes and models of furnaces and heat exchangers.
- Hand held telescopic inspection mirror
- Official Heat Exchanger Experts[®] Seal of Certification.

You will walk away with decades of knowledge in just one day. If you care about the safety of your customers or just want to be able to generate leads, this is the class for you.

OUR APPROACH

Heat Exchanger Experts is the only top ranked, nationally recognized heat exchanger inspection and training certification program in the nation. We bring over 60 field-tested furnaces and heat exchangers straight to your classroom, enabling hands on skill development, 1:1 mentorship, and industry certification.

Established in 1993 by HVAC expert, Ellis Prach, Heat Exchanger Experts delivers over 50 years of dedicated research and field knowledge for the evaluation and repair of residential heat exchangers all within one comprehensive, day-long course.

Taught by Experts

Russell and Christopher Prach are seasoned residential HVAC experts with over 30 years of experience inspecting, diagnosing, and installing residential furnaces, heat exchangers, and HVAC systems.
